VEDHAGIRI THEJESH

Cybersecurity Intern | Security Operations & Threat Analysis | Python & Network Security

+91 8106037538 • v.thejeshnaidu@gmail.com • linkedin.com/in/thejeshnaiduvedhagiri • github.com/vthejesh •

Bengaluru, India (Open to Relocation)

PROFESSIONAL SUMMARY

Highly motivated B.Tech graduate in Computer Science & Engineering specialising in Cybersecurity (CGPA 8.01/10, Class of 2026, no active backlogs) with intensive internship experience in Security Operations Center (SOC) processes and software automation. Proficient in monitoring security alerts, performing basic vulnerability assessments, and investigating logs across multi-vendor environments. Hands-on experience with firewalls, endpoint security, and networking protocols (TCP/IP, DNS, HTTP, VPN). Strong analytical and problem-solving abilities, ready to contribute to Ionic Info Solutions' cybersecurity operations.

TECHNICAL SKILLS

Cybersecurity & SOC: Alert Monitoring, Incident Investigation & Documentation, Vulnerability Assessments, Security Scanning, Log Analysis, Threat Intelligence

Infrastructure & Endpoints: Firewalls, Endpoint Protection (EDR), Active Directory, Windows & Linux Security, Group Policies (GPO)

Networking & Protocols: TCP/IP, DNS, HTTP, VPN configuration, Wireshark packet analysis, LAN/VLAN concepts

Programming & Scripting: Python (PCAP Certified, Advanced), Bash Scripting, SQL (MySQL, MongoDB), Java (NPTEL Certified), C

Standards & QA: OWASP Top 10 controls, Pytest testing, automated verification scripts, cloud deployment checks

Process & Tools: ServiceNow ticketing, Jira, technical runbooks (SOPs), client relations, Agile/Scrum

PROFESSIONAL EXPERIENCE

Cybersecurity Operations Intern | Segmento — Jan 2026 – Apr 2026

- **Alert Monitoring & Log Analysis:** Monitored and analysed security logs for **500+ daily events** across cloud and local infrastructures; assisted in identifying, investigating, and documenting security anomalies.
- **Vulnerability & Endpoint Support:** Performed basic vulnerability scans and endpoint security audits; developed Python scripts to automate log parsing, reducing triage response latency by **35%**.
- **Incident Documentation:** Assisted in document preparation for incident reporting and created **8+ SOP runbooks** to standardise threat mitigation steps.

Security & Systems Integration Intern | Cognifyz Technologies — Mar 2025 – May 2025

- **OWASP Control Testing:** Evaluated application vulnerability profiles against OWASP Top 10 guidelines; performed security scanning across **3 Agile sprints** to verify data configuration baselines.
- **Network & SQL Optimisation:** Optimised network communication sockets and SQL database queries, reducing data retrieval latency by **25%** and achieving **90%+ test coverage** via Pytest.

KEY PROJECTS

Automated Security Monitoring & Exploit Detection Engine | Python, SQL, Splunk API, OWASP, GCP

- Engineered a Python-based utility that parses syslog files to detect OWASP vulnerabilities, loop conditions, and brute-force access attempts, flagging **98% of anomalies**.
- Implemented custom correlation rules and automated email alerts, reducing compliance verification latency to **under 5 seconds**.

Enterprise Access & Authentication Portal | React, Node.js, SQL, Docker, VPN Auth

- Architected a secure configuration gateway employing Role-Based Access Control (RBAC) and VPN session protocols to manage permissions for **100+ virtual system nodes**.
- Integrated secure OTP enrollment checks and session token verification, packaging the application with Docker to establish **100% environment consistency**.

EDUCATION

Sri Venkateswara College of Engineering (SVCE) | Tirupati, AP — **CGPA: 8.01 / 10**

B.Tech in Computer Science & Engineering (Specialisation in Cyber Security) — Class of 2026

Class X: 99% | Class XII: 75% | no active backlogs

CERTIFICATIONS

- **Cisco Cybersecurity Essentials** (Cisco)
- **PCAP** – Python Certified Associate Programmer (Python Institute)
- **Programming in Java** – NPTEL (IIT Kharagpur)
- **Microsoft Certified: Endpoint Administrator Associate**

ACHIEVEMENTS & LEADERSHIP

- **Hackathon Winner (1st Place):** IIT Tirupati National Symposium 2025. Engineered and demonstrated a secure, working network/AI prototype under time-constrained conditions.
- **SAC Member & Event Lead:** Coordinated logistics for a university cultural and technical symposium hosting 12,000+ participants, demonstrating large-scale project management.
- **Basketball Team Captain:** Led the college varsity team to regional tournament wins; spearheaded team strategy, scheduling, and conflict resolution.
